Christmas Celebration

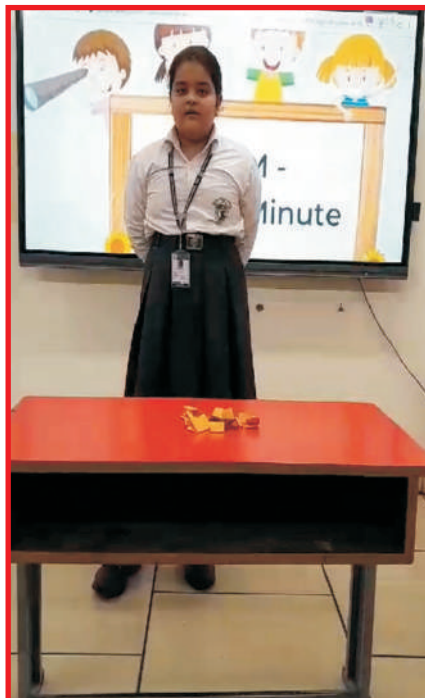

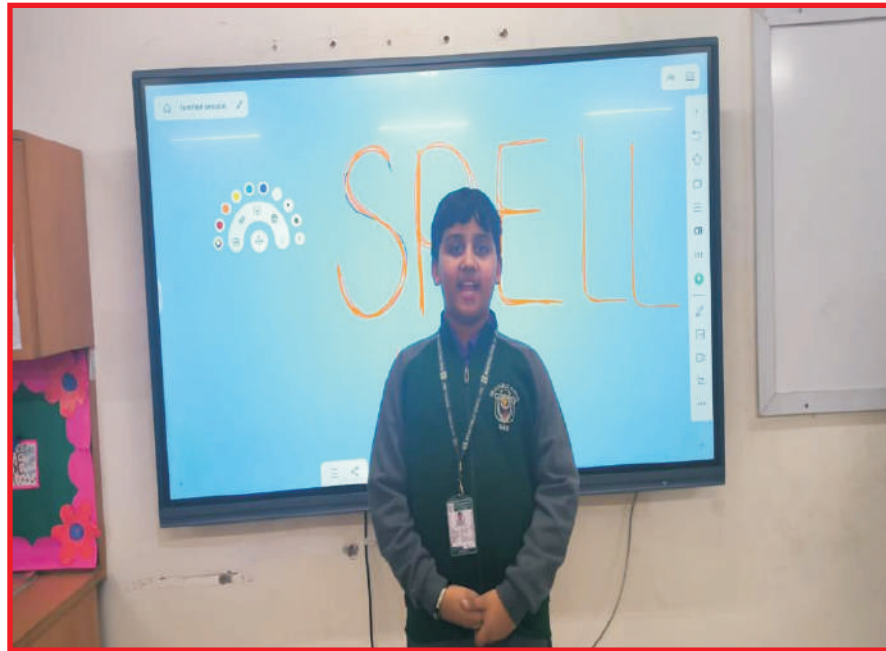

A Festive Celebration: Students Spread Christmas Cheer with a Class Party and Homemade Treats. In the spirit of the holiday season, our students of Primary Wing came together to celebrate Christmas with a joyous class party. The classrooms were adorned with colourful decorations, twinkling lights, and beautifully decorated Christmas trees, creating a warm and festive atmosphere and the students enjoyed a scrumptious feast together, with a variety of mouth-watering dishes and traditional Christmas delicacies. This celebration was truly a magical experience, reminding everyone of the joy that comes from celebrating together and spreading love and cheer during this special time of the year.

Wisdom of Words

To give our students a platform to showcase their talents, expand their horizons, and develop oratory skills, English week- 'Words of Wisdom' was conducted for the Students of Grades 3-5.

They enthusiastically participated in Just a Minute and Spell Bee activities. These activities paved a path to enhance their vocabulary in a fun filled way, stimulating a child's imagination, enhancing critical thinking and bringing forth the development of language skills. These activities nurture the intellectual curiosity of the students and encourage them to observe and think. Children participated with full enthusiasm and zeal.

Math-o-pedia

Math is all around us, in everything we do. It is the building block for everything in our daily lives. To give our students a platform to expand their horizons and develop mathematical skills, Math week- 'Math-o-pedia' was conducted for the Students of Grades 3-5. The Students got an opportunity to learn about various mathematicians like Srinivasa Ramanujan and Shakuntala Devi, and enthusiastically took part in the Math quiz. To enhance the creativity of the students activities like Geometrical Rangoli and Number drawing were done. These activities paved a way to boost their critical thinking and calculation skills in a fun filled way.

These activities nurtured the intellectual curiosity of the students' and encouraged them to observe and think. Children participated with full gusto and zeal.

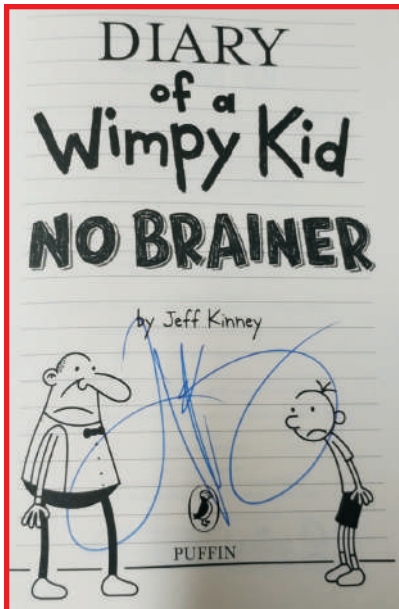

Books our Friends

"Today a reader tomorrow a leader " - Anonymous

We at DPS, GBN always inculcate the habit of reading amongst our young readers.

To encourage this habit at a tender age, a Book Fair was organized from December 14-16, 2023 in association with Pan World Education Private Limited. In addition, a workshop was organized by them wherein students enjoyed how to make Santa and trees.

Our young readers got an opportunity to meet the renowned author of the 'Diary of a Wimpy Kid' book series- Jeff Kinney on December 13, 2023. His interaction with the students was very motivating and encouraging. Their happiness was at peak as they bought books signed by him. Reading indeed helps develop language skills and vocabulary and stimulates the imagination of a child.

Subject Integrated Activities

English

"Creativity is contagious, pass it on." - Albert Einstein

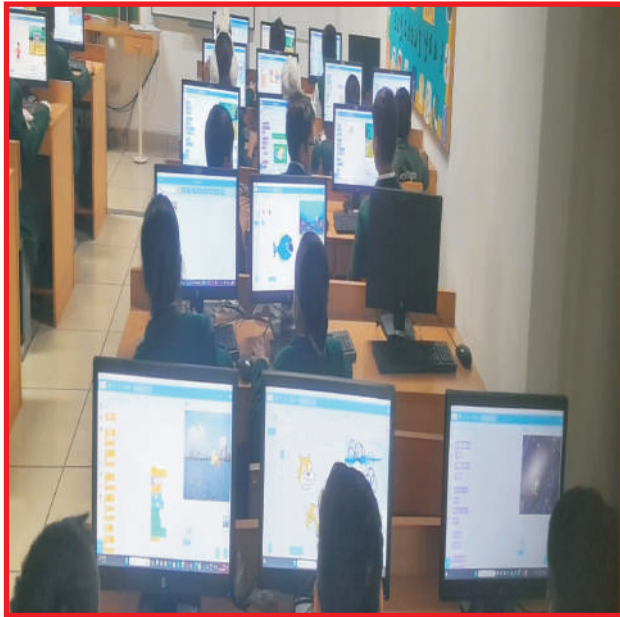

Engaging students in Creative English activities not only enhances their language skills but also fosters their imagination and critical thinking. Homophone Cone Activity was done in Grade 3 wherein the students explored homophones and created a homophone cone. This activity not only helped students differentiate between homophones but also encouraged them to use context clues to determine the correct meaning. For Grade 4 the adverb activity, 'How did my apples fall' was done in which students made a tree and wrote all the adverbs related to it. This activity not only allowed students to visually represent adverbs but also encouraged them to think creatively. It was a fantastic way to make learning about adverbs more engaging and unforgettable for the students.

Computer

"The computer was born to solve problems that did not exist before." – Bill Gates

Computer is a subject loved by all students especially in the ever changing world today. The interest that they hold have played a very vital role in their learning. Learning by doing helps them to grasp the subject better. The Students of Grade 3 explored the scratch application and came out with beautiful projects and even explored different sprites. The Students of Grade 4 tried their hands-on MS Power point. Remarkable PPTS were designed by our young learners. The Students of Grade 5 were briefed with MS Excel .\Various Lab sessions were given to the children as practice makes a person perfect. All these topics were enjoyed by the students thoroughly.

3rd Language

"With Language you are at home anywhere " - Edward De Wall

The Students of Grade 4 were exposed to mathematical shapes in German. They learnt about different shapes and their pronunciation. They enjoyed an activity wherein they made stick puppets out of their favorite shape and wrote their favorite word from the language. It was a wonderful experience for them.

EVS

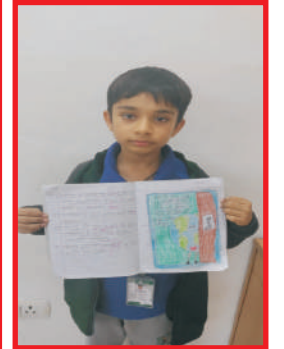

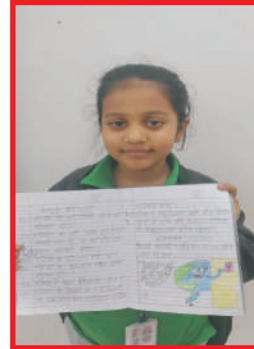

"Shoot for the Moon - even if you miss it, you will land among the stars." – Les Brown

We at DPS GBN create a supportive learning environment, where students can foster a sense of curiosity about natural world and help them develop an appreciation for the environment. In the recent class activity Students of Grade 3, were delved into the fascinating world of the phases of the moon and constellations. We aimed to deepen the understanding of these celestial phenomena and appreciate the beauty of the night sky. To reinforce the understanding, we engaged in a hands-on activity. Students made different phases of the moon and constellations on a sheet of paper beautifully. The main objective of this activity was to make them identify the different phases and constellations formed by the stars. We now understand how the moon's appearance changes over time and how constellations provide a way to navigate the night sky. This activity sparked curiosity and encouraged us to explore further the wonders of the universe.

‘ऊर्जा संरक्षण को अपनाएँ, भविष्य को उज्वल बनाएँ’

थॉमस अल्वा एडिसन ने पूरी मानव जाति के लिए वरदान साबित होने वाले बिजली के बल्ब के साथ-साथ कई विद्युत संचालित उपकरण का आविष्कार किया। परंतु इन उपकरणों को चलाने के लिए प्रतिदिन बिजली की जरूरत होती है। आज के समय में बिजली आवश्यक संसाधन में से एक है। आज हमारा दैनिक जीवन इसी पर निर्भर है। सभी जानते हैं कि बिजली उत्पादन कोयले या प्राकृतिक गैस के द्वारा उत्पन्न की जाती है। आज हमारे पास यह संसाधन सीमित मात्रा में है इसलिए बिजली का संरक्षण करना अति आवश्यक है। बच्चे ही कल की ‘रिफ्लेक्स जनरेशन’ हैं, जो भविष्य का पर्यावरण-अनुकूल समुदाय बनाने के लिए सहज उपाय करते हैं इसी बात को ध्यान में रखते हुए डी.पी.एस., जी.बी.एन. के कक्षा तीन के छात्र-छात्राओं द्वारा ‘बिजली बचाओ’ गतिविधि के अंतर्गत सचित्र नारा लिखकर बिजली के संरक्षण के साथ-साथ पर्यावरण संसाधनों के संरक्षण के प्रति जागरूक करने का प्रयास किया गया जिससे लंबे समय तक हम उनका उपयोग कर सकें।

Mathematics

Geometry is the foundation of all painting. - Albrecht Dürer

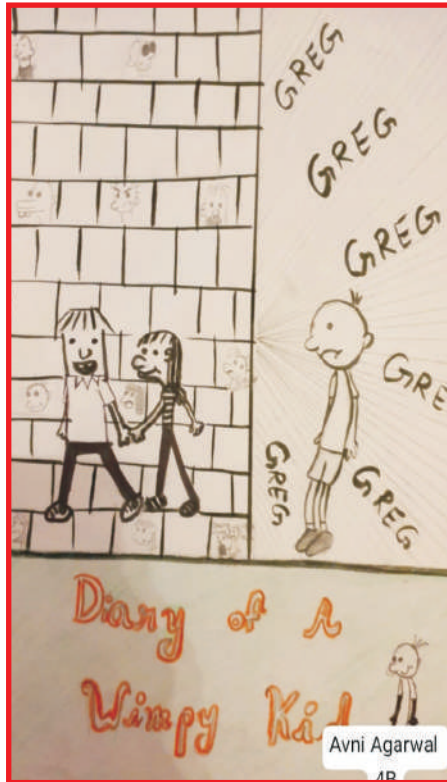

Studying geometry provides many foundational skills and helps in developing spatial skills, logical thinking, analytical reasoning, as well as building relationships between different data. To help them learn these skills in An interesting way, the young scholars of Grade 3 were asked to design a landscape using shapes and patterns. The learners turned up with amazing masterpieces of landscapes by using various geometrical shapes. The beautiful landscapes created by them were not only truly appealing to their aesthetic skills but also made them understand the basic shapes and their characteristic features. The sheer enjoyment of doing the activity made the learning impeccable in their minds.
